

DENNIS TISNA KUSUMA

Sr IT Specialist

+62 819-0602-4960 | dennistisnakusuma@gmail.com | <https://id.linkedin.com/in/denniskusuma>

PROFESSIONAL SUMMARY

Dynamic and results-driven Senior IT Specialist with over 7 years of experience in backend development and technical project management within the secure banking and financial technology sectors. Proven track record at Bank Central Asia (BCA) leading cross-functional teams to deliver high-availability payment governance systems, QRIS solutions, and digital wallet integrations. Possesses a unique blend of strong technical expertise in Java/API ecosystems and exceptional communication skills, frequently serving as a corporate Subject Matter Expert (SME) and technical trainer. Highly proficient in AI-assisted engineering, routinely integrating AI tools such as Claude Code into IT project work to accelerate development, automation, troubleshooting and delivery.

WORK EXPERIENCE

Bank Central Asia | *Backend Developer & Project Manager* (2019 – 2026)

- **Project Leadership:** Acted as Technical Project Manager leading a focused engineering team designing while simultaneously operating as the core developer to govern and optimize BCA's tax payment systems across various E-Channels, processing over trillions of IDR in daily transaction volume. Awarded '**Best Collecting Agent for Core Tax**' by the government in recognition of outstanding performance in engineering and maintaining BCA's high-volume tax payment systems
- **System Integration:** Developed Indonesia QRIS, QR Customer Presented Payment Mode using Java Native, collaborating seamlessly with other teams such as Mobile Banking to ensure secure and scalable flows processing millions of transactions.
- **API Management:** Designed and engineered the Internal API Gateway to streamline cross-channel communication, enabling individual channels to securely publish and consume specialized APIs that handle millions of API calls daily.
- **Corporate Advocacy & Training:** Selected as a Subject Matter Expert (SME), trainer, and guest speaker for prominent BCA corporate tech events, including IT WORKS and SAPA Fest, to educate internal teams on system architectures.

Openway | *Junior Technical Consultant* (2019)

- Collaborated with a prominent Russian banking consultancy firm to provide technical support and development solutions for international banking and financial software applications.

Freelance | *Database Designer & Developer* (2017)

- Designed optimal database architectures and developed secure backend functionalities for various client web applications.

CORE COMPETENCIES

- Technical / Hard Skills: Java Native, Spring Framework, RESTful API Design, SQL, Oracle Database, Git, Jenkins, OpenShift Container Platform (OCP), System and Database Design Architecture.
- AI-Assisted Engineering: AI-assisted development and code review (Claude Code), integrating AI into IT project workflows, prompt engineering, AI-driven automation and troubleshooting.
- Soft Skills: Technical Leadership, Public Speaking, Cross-functional Collaboration, Analytical Thinking, English Communication.

EDUCATION

Multimedia Nusantara University | Bachelor of Information Technology (2015 – 2019)
